

CLAM SHELL WHEEL SAFE

Thank you for purchasing a TRI ALL 3 SPORTS, Clam Shell Wheel Safe. The only hard shell case designed to hold two racing wheels. The Clam Shell Wheel Safe is used by Top Triathletes and Olympians worldwide.

A few hints for packing your valuable racing wheels:

1. Pull the skewers out of your wheel and place the wheels in the case. If you are packing 700C wheels you must let the air out of the tires. Make sure you place the rear wheel with the cassette facing the outside of the case.
2. Once you have placed one wheel in the case, place the egg crate foam pad over the wheel and place the 2nd wheel on top of the foam.
3. Once the wheels are secured in the case, place the 2 red straps around the case and secure the locking latches with 2 small locks.

Now go out there, have a good race and remember to wear your helmet and keep the rubber side down!
